POST INSTRUCTIONS FOR A BCG TREATMENT

After Instillation: Now that you have retained the medication in your bladder for the past one (1) hour, there are several things you must know:

- · Sit down on the toilet to urinate and fully empty your bladder.
- After urinating, pour two (2) cups of household bleach (Clorox or equivalent) into the toilet
- · Let the medication and Clorox mixture stay in the toilet for 15-20 minutes before flushing
- Repeat the above process each time you urinate for six (6) hours after each treatment
- · Drinks fluids normally

Until your next instillation:

- You may experience some burning with the first void after your treatment. If this occurs, you need to increase your fluid intake.
- If you experience continued pain or burning on urination or if you experience:

Bright red blood or blood clots in the urine
Joint pain Coughing
Fever greater than 101.5 Chills
Flu-like symptoms
